

ASC *Factory Cat 34*

asc

The ASC Factory Cat 34 is equipped with a large diameter main broom & designed for the toughest sweeping requirements regardless of irregularities in floor surfaces.

While sweeping, the filtered air system vacuums up the dust created by the brooms, so your stock and equipment stay clean. With its all steel construction, big electric motors, plenty of tractive power, and an average cleaning rate of 30,000 square feet an hour, the ASC Model 34 is the perfect choice for most sweeping jobs.

Factory Cat's side brooms pick up dirt in the corners. A huge tubular main broom under the machine sweeps up the dirt and debris from the floor and packs it into the steel hopper.

Meanwhile, the second stage vacuums up the dust and traps it in a polypropylene felt "baghouse" filter. Factory Cats can pick up whole bags of cement at a time without leaving a trace of dust behind. The filter is cleaned by an on-board mechanism, and in most cases will last the life of the machine.

Factory Cat's "Central Command" energy management system gives our Model 34 electric & Rider 48 Models power formerly available from only gasoline or propane-powered machines. The Rider Model 48 is the most powerful & compact battery-powered sweeper and can run a full shift on a charge.

Few production machines can save you as much as a Factory Cat sweeper. If you do not currently use a power sweeper, Model 48 will cut your labour costs for sweeping by a factor of ten or more.

These direct labour savings permit tremendous economy, even in small plants. The Model 48 can sweep some 500,000 sq. ft. in one shift, and on a single charge.

ASC Factory Cat 34 Features & Equipment:

- ✓ Built tough, will not break designed to last a lifetime.
- ✓ The worlds toughest walk behind sweeper.
- ✓ Direct throw sweeping system.
- ✓ Easy to use.
- ✓ Self adjusting main broom.
- ✓ Maintenance free Dust filter – guaranteed not to blow dust!
- ✓ On board charger.
