## INDUSTRIAL RIDE-ON SCRUBBER-DRYER

### PRODUCTIVITY AND VERSATILITY GUARANTEE THE BEST PERFORMANCE.

Powerful and versatile the ASC E110-D offers as standard patented systems and innovative technologies which improve performance and productivity.

The ASC E110-D integrates the best solutions in terms of safety, savings, and the quality of cleaning.

With the combined use of the ECOsystem®, DoseMatic® and FlowMASTER® technologies which optimize the use of resources, it is possible to drastically reduce both cleaning time and consumption of cleaning solution.

The adjustable brush pressure ensures the best cleaning results in every operational situation.

All of this without forgetting driving comfort and controls which are easy to read, making it possible for anybody to use this high-tech scrubber-dryer without the need for long and demanding training.

### FEATURES

- Simple and intuitive to use
- Quiet during operation
- ECOsystem® available as standard, with automatic cleaning cycle
- Front and rear lights included
- Adjustable brush pressure
- Traction motor protected against impact, dirt, and humidity
- The Brush'O-Matic® system enables quick brush coupling / uncoupling
- Adjustable brush pressure
- High capacity solution tank
- Eco-friendly, zero emissions
- Stainless steel debris collection basket
- Recovery tank easy to clean and maintain
- Self-levelling splash guard with pre-scrub setting
- Adjustable squeegee, without the need for tools
- Squeegee blades can be used on 4 sides

### \* NEW TECHNOLOGY USED

- FlowMASTER® 5 levels of cleaning solution flow, proportional to the forward speed of the machine
- DoseMatic® automatic detergent dosing system with automatic circuit cleaning

#### RESISTANT AND SAFE

The robust frame realized in thick steel provides protection to both the operator and the internal parts of the machine. The optional overhead guard can be fitted to the E110-D for added safety.

#### PRODUCTIVITY AND SAVINGS

Combining the advantages of the ECOsystem® with the versatility of DoseMatic® it is possible to use the long runtime of the battery to the maximum. The E110-D reduces the frequency of stops during cleaning operations, delivering more productivity and greater savings.

#### TRACTION MOTOR

Powerful and reliable, the traction motor is vertically installed in the front part of the machine. The front wheel is driven via a gear box which is lubricated and sealed to protect it against impact, dirt, and humidity.

#### COMFORT AND SAFETY

The operator's seat is equipped with weight sensors and a seat belt, it is also possible to cut off power in an emergency or during maintenance operations, guaranteeing maximum protection and safety to operators and mechanics.

### ERGONOMIC CONTROL PANEL

The ergonomic control panel has simple and intuitive controls which allow the operator to comfortably access all the features of the machine.

### STAINLESS STEEL BRUSH DECK

The pressure of the robust brush deck can be adjusted by the operator according to the type of work being carried out. Fitted with a self-levelling splash guard, the brush deck is made of stainless steel to provide greater durability and resistance in corrosive environments

### ECOSYSTEM®

This exclusive system which reuses cleaning solution, saves water, detergent, and hours of work, with significant savings on running costs.
