ASC EUREKA M8

BULLSYSTEM® TECHNOLOGY SWEEPER

The only ride-on sweeper that offers direct forward throw sweeping and a front driving position.

The innovative design of the ASC Eureka M8 - the only machine on the market that offers direct forward throw sweeping and a driving position at the front of the machine with an automotive steering system - makes this industrial sweeper particularly easy to handle, ideal for different applications and types of dirt.

The flagship feature of the ASC Eureka M8 is its ability to pass over speed bumps and manage sudden changes in gradient. Thanks to the patented BULLsystem® this new Eureka sweeper is the only machine of its kind which offers a practical solution to this problem, an impossible task for any other industrial sweeper.

Another patented technology, the Gradient Booster®, enables the ASC Eureka M8 to overcome gradients of 21% without losing power. The seriously tough structure (the entire machine body and chassis is made of steel), a wide cleaning path (up to 2.100 mm) and the high capacity hopper (up to 500 L with the LoadBOOSTER® compaction system) do the rest.

THE RESULT IS A MACHINE THAT IS:

- High performance
- Easy to drive
- Easy maintenance
- Adapted to both compacted and heavy dirt (gravel, sand...) and to lighter, bulkier debris (paper, pine needles...)
- Ideal for: industrial areas, logistics hubs, open air, covered and multi-storey parking, pedestrian areas...

MULTIBRISTLE® MAIN BRUSH

Unique brushes with mixed bristles to pick up different types of dirt in a single pass.

INDEPENDENT TWIN WHEELS

Guarantee better stability, reduced wear of the tyres, a light turning radius and easy steering from a stationary position.

ANTI-JAM PROTECTION

Prevents the brush and bearings from being damaged by string, and plastic or metal filaments, safeguard's brush performance and lifetime.

DRIVER'S CABIN

Security and driving comfort are increased with the pressurized air-conditioned cabin. Offers maximum protection to the operator and provides full visibility of the right side brush.

DIRECT FOWARD THROW

This sweeping method delivers the best cleaning results. It efficiently manages both fine dust and heavy or bulky debris.

DRIVEOVER® SYSTEM

The ASC Eureka M8 has been designed to pass over speed bumps without difficulty, an impossible task for any other sweeper in the same category.

BULLSYSTEM® TECHNOLOGY

All the effectiveness of direct forward throw sweeping.

- All the hopper capacity of a rear loading sweeper.
- All the maneuverability of a ride-on sweeper with front driving position.
- The ability to overcome speed bumps of any size.
- Complete use of the hopper thanks to the LoadBOOSTER® debris compaction system.

VERSIONS

ASC Eureka M8 HDK - with 1,500 cm³ 4-cylinder, 36 hp Kubota engine with liquid cooling.
ASC Eureka M8 HGK LPG

APPLICATIONS

Industrial manufacturing: Paper mills, cement works, glass works, foundries, brickworks...
Logistics: warehouses, logistics hubs, ports and airports...
Public areas: car parks, holiday villages and camp sites, town centres, cycle tracks, theme parks...

SURFACES

Concrete, porcelain tile, road surfaces, quartz finished concrete paving stones, self-blocking paving stones, porphyry, cobblestones, asphalt and any other floor types in any condition.

TECHNICAL SPECIFICATIONS

ASC M8

CLEANING PATH with two side brushes	2.100 mm
CLEANING PATH with main brush	1.270 mm
FORWARD SPEED	14.2 km/h
HOURLY PERFORMANCE	29.820 m ² /h
DIRT CONTAINER CAPACITY	500 L
HIGH DUMP HEIGHT	1.500 mm
FILTER TYPE	Multipocket® / 13 m ²
MOTOR	Diesel Kubota 36 Hp
TRACTION TYPE	Hydraulic
VOLTAGE	12 V
WEIGHT	2.090 kg
DIMENSIONS	2.755 x 2.080 x 2.515 mm

DIRECT FORWARD THROW SWEEPING / FRONT DRIVING POSITION WITH AUTOMOTIVE STEERING SYSTEM / INDEPENDENT TWIN WHEELS / COMPACT TURNING RADIUS / HIGH VISIBILITY, AIR CONDITIONED CABIN / DOUBLE SIDE BRUSH ON RIGHT SIDE / 13M² FILTER WITH AUTOMATIC CLEANING SYSTEM / KUBOTA ENGINE WITH FRONT RADIATOR / FRAME, CHASSIS AND HOPPER IN STEEL / WET SIDE BRUSH DUST CONTROL /
