ASC MACRO M40

STREET SWEEPER

The MACRO M40 is the latest generation mechanical suction road sweeper.

Its cabin is both spacious and comfortable while in use and features great manoeuvrability.

Its solid structure and the filtered suction mechanical sweeping system, make it suitable for all types of cleaning, in very dusty facilities.

Specifically designed for use in Aluminium, Cement, Mining and Port applications, the 4 cubic metre hopper is perfect for use in industrial plants, where compact dimensions and great cleaning efficiency are required.

An EASY START package is standard on the machine. By pressing the EASY START button, it automatically activates all the machine functions, simplifying operation. This greatly reduces operator training time.

FEATURES

- By pressing the EASY START button, it automatically activates all the machine's functions. This ensures almost anyone can operate the sweeper.
- The geometries of the machine have been carefully engineered, in order to achieve maximum productivity. This is achieved by a four wheel steering system, designed to maximise sweeping productivity.
- The cabin of the M40 is state of the art. It is comfortable and spacious. The Cabin is both pressurised and carefully insulated. This ensures comfortable use in varying outside temperature, noise, vibration and dust, to make long shifts less tiring.
- A host of options are available on the unit, including high bin dump, extendable side broom, water suppression and a vacuum wand hose attachment.

* MAIN OPTIONS

ADJUSTABLE FRONT BRUSH

Fully adjustable third front brush that allows to sweep 180° left and right side.

HIGH DUMP CAPACITY

Dumping at any height between 1,05 and 2,1m.

REAR VACUUM HOSE

Rear powerful wandering vacuum hose, 6 m length - 140mm diameter. High pressure washing system (140-200bar) w. spray gun and 12m-hose reel.

SIDE BRUSH

Side brush dust suppression skirts for dry dust-free sweeping.

EASY START BUTTON

To make the machine even easier to use, pressing the EASY START button automatically activates all the machine functions. Moreover, thanks to a simple selector, the working parameters can be changed according to working conditions.

FOUR STEERING WHEELS

The geometries of the machine have been carefully studied in order to achieve maximum productivity. Thanks to the four wheels steering, you get a clean track free of dirt lines even when making very tight turns.

CABIN COMFORT

The sweeping system of Macro M40 is designed to everything related to the well-being of people. Comfortable and spacious, it has been carefully insulated from outside temperature, noise, vibration and dust to make long shifts less tiring.
