

ASC EUREKA E75

Professional
Walk-Behind
Scrubber-Dryer.

It is available with 2 PPL disks or pads of 65cm and 75cm which, combined to a speed of 6 km/h, boasts an area coverage of 4.500 sq/m/h.

Our major aim was to design a compact machine, fast and productive, that can be purchased at a very competitive price. E65/E75/E83 is therefore a modern alternative to bulky walk-behind or outdated/out-sized ride-on scrubber-dryers.

E75 offers the economic advantage to be used up to four non-stop working hours thanks to the optimisation of energy consumption. The compact size allows the machine to pass even through traditional doors or be transported in lifts.

E75 guarantees a dramatic reduction in the cost of cleaning, thanks to an extremely competitive purchase price and a complete set of standard equipment which reduces waste and consumption. No more time and costs wasted on operator training, thanks to the very simple and user-friendly controls.

DESIGNED BY EUREKA FOR THE MAINTENANCE CLEANING OF AREAS UP TO 8000 M2,
WHICH ALLOWS A DRAMATIC REDUCTION IN THE COST OF CLEANING.

ASC Eureka E65/E75/E83 Features & Equipment:

E75 is a new, user-friendly ride-on scrubber-dryer designed by Eureka for the maintenance cleaning of areas up to 8000 M2, which allows a dramatic reduction in the cost of cleaning.

- > THE RECOVERY TANK is equipped as standard with a stainless steel basket to avoid the passage of larger debris which may clog the system.
- > THE VACUUM-MOTOR is silenced, and guarantees a very low acoustic pressure level which is particularly appreciated in noise sensitive environments such as nursing homes and hospitals.
- > THE TANKS boast a capacity of 110/125 litres, and thus guarantee a very high productivity and reduce time wasted for emptying/refilling operations.
- > WITH THE OPTIMISATION OF ENERGY CONSUMPTION the E75 can be used for up to four non-stop working hours.
- > AUTOMATIC SQUEEGEE UNCOUPLING when accidentally impacted avoids damage to the machine or to the environment.
- > THE SCRUB DECK is equipped with a self-adjusting splash-skirt which, besides preventing the dirt water to splash during the cleaning session, allows for water-leaking prevention.
- > THE EASY AND INTUITIVE CONTROLS ensure user-friendliness, without additional costs for operator training.
- > THE DRIVE MOTOR is completely sealed and protected by a strong, tubular bumper. Additionally, the machine is equipped with an anti-tilting device for increased safety.

The NEW ECO LINE of scrubber-dryers

Is made up of 9 models, available in 18 versions, and is ideal for the thorough cleaning and maintenance of small, medium and large size areas.

The scrubbers are available either push-type or ride-on, and upon request can be quipped with the new, exclusive ECO system (patented), which breaks water economy and detergent saving barriers, and has won several awards (among them, the Veneto Sviluppo award issued by the University of Padua).

The system has been designed to guarantee impressive labour/water/detergent savings, and boasts a productivity rate 3 times greater than traditional systems.

FIELDS OF APPLICATION

Industrial sites, communities and vicinities, schools, offices, religious buildings, hospitals, public buildings, airports, ports, shopping malls, logistical depots, cleaning companies and multi services.

SUITABLE CLEANING SURFACES

Ceramics, marble, cement/concrete, linoleum, non-slip surfaces, porcelain tiling and many other dirty conditions.
