## ASC Eureka E61 Characteristics

### ECONOMICAL & ECOLOGICAL

The ECO configuration is equipped with the new, exclusive ECO system (patented), which breaks water economy and detergent saving barriers, and has won several awards (among them, the Veneto Sviluppo Award). The system has been designed to guarantee impressive labour/water/detergent savings, and boasts a productivity rate between 3 and 5 times greater than traditional systems. With the exclusive Eco system we propose a unique method to utilize water in such a way that you will increase labor productivity and thus reduce time squandered in emptying/refilling operations. Additionally, this permits you to minimize the quantity of both cleaning detergent and water necessary for performing the task. Hence massively increasing productivity and reducing labor.

In addition, the Automatic Solution Dosing Device makes sure that the flow of solution is always proportional to the speed of the machine.
