

# ASC EUREKA M1

The ASC Eureka M1 is Australia's biggest selling quality walk behind sweeper.

OUR MAJOR aim was to design an innovative machine that was fast, productive and easy to use. It is sold at a very affordable price to bring quality into the entry-level sweeper market.

IT IS AVAILABLE either driven by a petrol engine (Honda) or battery powered. The electric version, which is extremely quiet and pollution free, is particularly suitable for internal applications

THE WALK BEHIND SWEEPER Eureka M1 has a sweeping path of 780 mm, and boasts a working capacity close to 3.510 sq\m\h.

THE INNOVATIVE FEATURE of this machine outside its sweeping ability is the collection of dust: in fact, fine dust is filtered through a polyester bag filter (class S), which allows for an excellent filtering rate (99,9%) and has a much longer lasting life than traditional sweepers using high cost, high maintenance paper filters. The dust filter can be cleaned thanks to an efficient mechanical shaker and should last 3 or more years without replacement

THE WALK BEHIND SWEEPER ASC EUREKA M1 IS A NEW RANGE OF WALK BEHIND SWEEPER IDEAL FOR THE FAST, EFFICIENT SWEEPING OF MEDIUM SIZE AREAS.
