

ASC 125

Ideal sweeper
for industrial and
urban cleaning

The ASC 125 sweeper is relatively inexpensive and can be configured as a rider on sweeper or a compact walk behind. The model 125 can be used unrestricted & driven without a licence.

The machine runs a proven mechanical suction & dust filtering system and is able to sweep at high speed. It picks up light and heavy waste such as leaves, glass, cigarette butts, paper, cans, fine dust and sand. The machine can be also be used in dusty applications, as it has an inbuilt dust filtration system. The machine also has water sprays to suppress side broom dust.

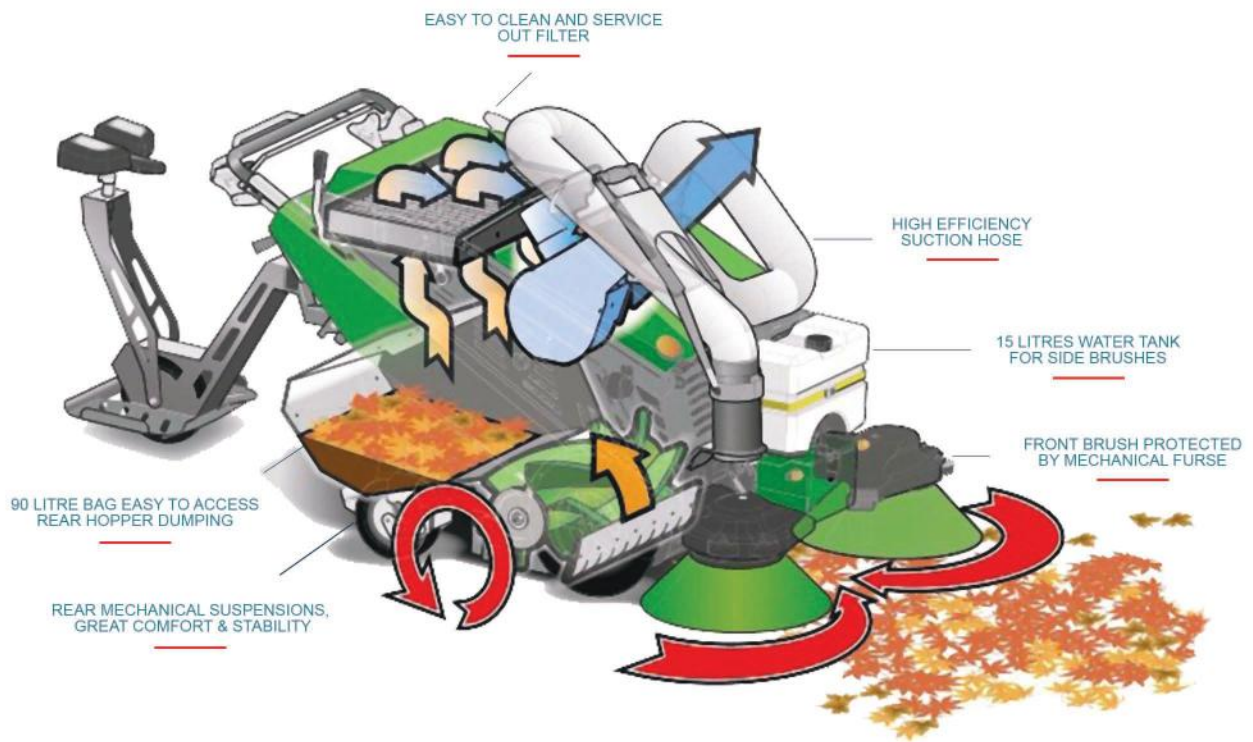

The ASC Model 125 comes in 2 versions (electric EH) for a run time of 5 hours or a Honda Petrol version (SH) for non stop continual use. The machine has a large 90 litre hopper and has 2 large oversized front wheels and rear castors designed to climb footpaths easily with operator comfort in mind. The machine also has a standard suction hose to reach hard-to-access areas and clean away material like cigarettes butts and paper.

BATTERY EH VERSION: The Battery EH can be used by councils & other users at any time of the day or night as its whisper quiet in operation. The undeniable advantage here is that it allows councils to sweep during the day while pedestrian traffic is on the footpaths. It also allows schools to clean sweep for the first time while class is in progress without disturbing the students. This not only saves time and money but utilises labour much more efficiently as cleaning is an ongoing process.

THE ASC 125 IS THE WORLD'S CLEANEST BATTERY OR PETROL SIDE WALK SWEEPER DESIGNED SPECIFICALLY FOR OUTDOOR AREA SWEEPING.

- > Easy to drive
- > Hand held wand for access to hard to reach areas
- > Floating side brooms
- > Oversized drive tyres for comfortable operation
- > Basic drive line
- > Comfortable and detachable sulky seat
- > Quiet operation

BUILT TO LAST

The ASC 125 has been designed with both the operator and mechanic in mind. It uses a simple drive train with standard belts and pulleys. In fact it's how all sweepers should be built, to eliminate expensive overhauls and repairs. All components are easy to access and made from reinforced steel.

APPLICATIONS

Indoor and outdoor carparks, councils, hospitals, RSL and league clubs, schools and colleges, contractors, shopping centers, airports, mining sites & sporting arena's.
