

ASC BIN VAC 250

To eliminate your
cleaning headaches

Whilst it's common place to see petrol blowers used to remove debris around they simply create too much dust and only temporarily remove debris like leaves and paper from hardstand areas. The visual effect may only last 10 minutes before the wind blows back the debris. When you look at it logically it's a pointless exercise.

The ASC 250 has the massive advantage that it actually sucks up all debris like paper, bottles, glass, cans, confetti, pine needles and litter quickly and efficiently into a sealed bin. It does this effortlessly in a fraction of the time it would take to do this task manually. It's quick, easy and totally dust free as the ASC 250 has an internal dust collection feature.

The ASC 250 is designed to be used by municipalities, airports, garden centres, fast food outlets, service stations, caravan parks, playgrounds, hotels, pubs, schools, households as well as industrial sites. There are thousands of applications this machine can be used for. There is no licence required to use it and it's as easy to operate as a domestic lawnmower.

The ASC 250 is a solid & reliable machine designed and hand built in Italy. It's powered by a Japanese Honda engine and comes with a heavy Sulo bin and designed to last many many years with proven internal components.

It can be serviced by any Honda agent when required and has the advantage of being able to be stored anywhere given its compact size.

It's an amazing machine designed to eliminate your cleaning headaches.

THE ASC **BIN VAC 250** IS A UNIQUE CONCEPT THAT WAS DESIGNED SPECIFICALLY TO OUTSOURCE MANUAL AND TIME CONSUMING SWEEPING OF INDOOR AND OUTDOOR AREAS.
