

# ASC DULEVO 120

Industry leader for  
warehouses and  
production factories  
- blows NO dust!

THE DULEVO 120 is made to meet and exceed the strictest cleaning and dust emission requirements in a wide variety of industrial applications. The net benefit of using an ASC Dulevo 120 Elite is the overall improvement of the health, safety & cleanliness of the workplaces wherever it sweeps. Day or night.

THE ASC DULEVO 120 ELITE uses the direct-throw sweeping system and world renowned bag house filtration system. A Gore\* Filtration system is also available as an option on the ASC Dulevo120 guaranteeing any user compliance to the EPA PM10 emission standards. Using an ASC Dulevo will guarantee and end user the cleanest sweep and dust control of any sweeper on the global market.

THE LARGE RIDER sweeper ASC Dulevo 120 Elite works on a simple principle. The collection system starts with the side broom(s) which transfer dust and debris towards the centre of the Dulevo 120 machine where a large diameter cylindrical main broom throws everything forward into the 450 litre waste hopper. Fine dust is also drawn directly into the waste hopper by a powerful vacuum system which is created by a high efficiency fan and a heavy duty filter ensuring that only clean air is exhausted back into the environment.

THE ASC DULEVO is used extensively in Australia by the mining industry, brick manufacturers, transport companies and cleaning contractors alike.

ASC DULEVO 120 ELITE HEAVY DUTY SWEEPER
