

ASC EUREKA M3

Advanced Technology
and Innovative
Features

THE WIDE sweeping path (1200 mm) combined with the fast operational speed assures a large cleaning capacity (up to 11,000 sq\m\h.) and the compactness of this sweeper , with its small turning radius (1.000 mm) makes it particularly suitable for sweeping in narrow, confined areas not accessible by larger machines.

THE FLOATING, self-levelling main brush and the retractable, anti-shock side brushes, allow for maximum cleaning efficiency on rough or uneven floors, while the large filter area enables sweeping in the dustiest of environments. This, in conjunction with a large debris hopper, reduces the emptying time, increasing overall productivity.

In addition, the original italian touch is visible in the design of the external shapes: this adds an attractive appearance, which is appreciated by customers all over the world. After all, productive does not necessarily mean bulky.

THE SMALL RIDER sweeper ASC Eureka M3 is ideal for sweeping large areas in total comfort, quickly and at low costs.

THE ASC EUREKA M3 IS A COMBINATION OF TECHNOLOGY AND NEW IDEAS, WHICH WILL ENABLE THE USER TO KEEP LARGE AREAS CLEAN, BY WORKING IN TOTAL COMFORT, QUICKLY AND AT LOW COSTS.
