ASC EUREKA E110-R

THE "2 IN 1" FROM EUREKA

Save on investment and running costs with a sweeper-scrubber.

Cut costs using a combined on-board machine. The ASC E110-R has been designed to sweep, scrub and dry contemporarily, all in a single pass.

The patented ECOsystem® saves water and detergent, maximizing productivity while reducing costs and the environmental impact of cleaning. This technology provides three times more uptime for every tank refill, making the ASC E110-R the ideal machine for daily cleaning operations.

The machine is fitted with two cylindrical brushes, which rotate at high speed, allowing you to sweep and scrub in a single pass. The brushes pick up debris and at the same time guarantee exceptional cleaning results.

Eureka's powerful drying system maximizes water pick up, leaving floors clean and completely dry. With the ASC E110-R floors are immediately ready for traffic, without the risk of slip and fall accidents.

The ASC E110-R is designed to work in tough applications. The machine is constructed with high quality materials to enhance performance, reliability, resistance, and durability over time.

With a 110 cm cleaning path and a forward speed of up to 8 km/h, the ASC E110-R delivers an impressive hourly productivity rate of 8,800 m²/h.

It's versatile and can be used to clean both large areas and compact spaces.

FEATURES

- Simple and intuitive to use
- Quiet during operation
- ECOsystem® available as standard, with automatic cleaning cycle
- Front and rear lights included
- Traction motor protected against impact, dirt, and humidity
- Quick brush coupling / uncoupling
- Solution tank easy to refill
- FlowMASTER® - 5 levels of cleaning solution flow, proportional to the forward speed of the machine
- Stainless steel debris collection basket
- Recovery tank easy to clean and maintain
- Self-levelling splash guard with pre-scrub setting
- Adjustable squeegee, without the need for tools
- Squeegee blades can be used on 4 sides
- Maximum speed selector

* OPTIONAL

- The overhead guard is made with thick steel to protect the operator and the machine against potential impact and stress.
- Double side brush

SIMULTANEOUSLY SWEEPS AND SCRUBS

The ASC E110-R sweeps, scrubs, and dries in a single pass, saving time, resources, and equipment.

HIGH CAPACITY SOLUTION TANK

Boost uptime with ECOsystem® technology, which increases the productivity of the high capacity 220 L solution tank by up to 3 times.

DOSE-MATIC® SYSTEM

Thanks to a simple control it's possible to personalize in real time the percentage of detergent according to the type of dirt present on the floor. Dose-Matic® reduces detergent consumption by up to 50% and increases both productivity and the quality of cleaning results.

MAINTENANCE MADE EASIER

The components of the machine that require inspection and maintenance can be easily removed, without using tools.

ERGONOMIC CONTROLS

The ergonomic control panel is fitted with practical and intuitive controls, which allow the operator to access all the machine's functions directly from the driver's seat.

EUREKA'S DRYING SYSTEM

Eureka's drying system guarantees clean and dry floors, ensuring maximum safety and hygiene. The squeegee blades can be used on four edges and can be adjusted and changed without the need for tools.

ECOSYSTEM®

This exclusive system which reuses cleaning solution, saves water, detergent, and hours of work, with significant savings on running costs.
