ASC EUREKA E51 V1

COMPACT FOR PROFESSIONAL USE

Elegantly designed scrubber-dryers with a tough attitude. Designed for professional use, the ASC E51 are the ideal solution for areas between 250 and 2.000 m², delivering maximum efficiency even in congested spaces with hard to remove dirt.

The ASC E51 has a single brush deck, with a cleaning path of 530 mm, and hourly productivity rate of 2.280 m²/h. The ASC E51, thanks to a double brush deck, offers even greater productivity whilst maintaining maneuverability and ease of use.

ROBUST STRUCTURE

The robust structure undergoes different phases of treatment using zinc phosphate, cathodoresis and a thermosetting paint, to protect the steel frame. In the Chrome[®] version the frame, squeegee and mechanical components are in stainless steel, providing enhanced resistance when working in highly corrosive environments.

BRUSHES

The ideal synergy between the rotations per minute of the brush and the pressure that the brush deck delivers to the floor, create the best conditions to obtain the highest quality cleaning results. It is possible to choose between multiple types of brushes and pads to clean every type of floor.

MULTIFUNCTION DISPLAY

Simple and ergonomic commands make the machine easy to use in tight or congested spaces, without tiring the operator. Operation is intuitive and does not require specific training.

ONBOARD BATTERY CHARGER

The onboard battery charger is the ideal way to charge the battery quickly. Depending on the type of battery fitted, the machine can also be charged in areas with little ventilation.

FEATURES

Extremely robust structure made up of a resistant sandblasted frame, which is treated with zinc phosphates and coated with a thermosetting powder

EUREKA'S DRYING SYSTEM

Eureka's drying system guarantees immediately clean and dry floors, providing maximum safety and hygiene. The steel squeegee offers added durability and resistance against collisions.

VERSIONS

- ASC E51 BASE M (mechanical)
- ASC E51/ASC E51 TRAC M (mechanical, with electronic traction)
- ASC E51/ASC E51 TRAC TRONIC (with a package of standard features, dedicated to the comfort of the operator)
- ASC E51/ASC E51 ECO (full-optional, with ECOSYSTEM® - optional extra)

APPLICATIONS

Restaurants, kitchens, bars, swimming pools, changing rooms, hospitals, clubs, industrial areas, supermarkets, pharmacies and other small to medium sized areas.

SURFACES

Ceramic, marble, cement, linoleum, porcelain tiles, rubber.

	ASC E51 V1
CLEANING PATH	530 mm
FORWARD SPEED	4,3 km/h
HOURLY PERFORMANCE	2.280 m ² /h
SOLUTION TANK CAPACITY	40 L
RECOVERY TANK CAPACITY	56 L
BRUSH PRESSURE	34 kg
SUPPLY VOLTAGE	24 V
WEIGHT WITH BATTERIES AND CHARGER	213,5 kg
DIMENSIONS WITHOUT SQUEEGEE	1.317 x 555 x 1.110
WIDTH WITH SQUEEGEE	830 mm
