ASC POWER VAC

WALK BEHIND LITTERVAC POWER VACUUMS MACHINE

ASC LitterVac Power Vacuums are ideal and versatile for use in factories, warehouses, stables, indoor and outdoor sports facilities, machine shops, amusement parks, regional airports and many more solutions that need litter & debris efficiently cleaned up.

Our ASC LitterVac's clean up to 40,000 square feet per hour picking up various litter and debris, such as: machine shop shavings, flat stock, cans, bottles, broken glass, sand, pieces of wire, foam packing, plastic pellets and too many more to name.

If you are in a property management company, janitorial service, maintenance group, government agency or in your own business, the decision as to the proper cleaning machine is not unusual. Your search till now must have led you to the ASC Power Vac but which model and accessories? The walk behind sweeper ASC Littervac is ideal as a litter and debris control device but is not recommended for fine dust and powdery dirt. For the latter refer to our model ASC Eureka M1.

Our Power Vacs are powered by Gasoline, Propane, Electric or Battery.

ASC POWER VAC - VERSIONS

PROPANE POWERED

They offer 12 x more efficiency than the conventional cleaning methods. Another best feature about our Power Vacs is low maintenance.

GASOLINE POWERED

The Gasoline Model provides the futuristic Quick Tilt design. This is quipped with the Snap-on dolly Assemblage, which keeps the bag off the ground. The immensely 11 cu. Ft. bag made with polyester.

BATTERY POWERED

Powered by the ultimate 2 x 12-volt deep cycle type batteries, in turn producing a 24-volt system for long-lasting operation. There is an option for a charger if required.

ELECTRIC POWERED

The Electric model offers a continuous source of power and the ability to clean where gasoline units cannot. The 1.5 HP A.C., 60 cycle, single phase 110/220 volt motor operates at a constant 3450 RPM.

OPTIONAL TEN-FOOT HOSE

The simple and lightweight design facilitates maneuverability and storage. Users can go for an optional ten-foot hose with the vacuum. This enables the vacuum to clean small and targeted areas, on or aboveground levels.

SNAP-ON DOLLY ASSEMBLY

The quick tilt feature with the Snap-on dolly Assembly allows the unit to pull large objects in the air suction. The immensely powerful unit features an 11 cu. Ft. bag made with polyester that ensures perfect balance for the tilt.

LITHIUM-ION, ELECTRIC, BATTERY, GASOLINE OR PROPANE POWERED

The walk behind sweeper ASC Littervac vacuum is a versatile machine enabling you to attack many different jobs in various environments.

The **ASC Power Vac** is a heavy duty walk behind machine made in New York, USA.

SHIPPING WT	200 lbs	180 lbs	160 lbs	400 lbs

The walk behind sweeper ASC Littervac is still hand built in the USA (New York) to this day and the design elements have not changed since 1950. The walk behind sweeper ASC Littervac features a steel suction impellor and frame ensuring extremely long life and low maintenance costs. Most competitive look alike littervac machines made today are plastic based and lack the industrial strength or suction ability made famous by the USA hand built ASC Littervac.
