## ESCALATOR AND TRAVELATOR CLEANER

### Perfectly clean escalators in less than an hour!

The revolutionary design of the EC52 enables you to work in 2 phases, dry and wet.

The dry sweep cycle removes stones, sand and any other deposits from the grooves in the treads and from between the steps and the side balustrade.

The wet cycle guarantees the removal of stains and encrustations thanks to the combined action of the detergent solution, which is sprayed directly onto the steps, and the special PPL brushes that ensure deep cleaning without scratching the paint or coating on the escalator or travelator.

Also available with **ECOsystem®**, these efficient scrubber-dryers save water, detergent, and labour costs, delivering up to 80% of savings on overall running costs.

### Fast, simple, effective, and reliable

Compact and easy to handle, when in position, the EC52 escalator cleaner works autonomously, leaving the operator free to use cleaning time more productively.

The EC52 brush deck is protected by a stainless-steel casing which protects the machine and creates a vacuum chamber around the brushes, maximizing residue pick up.

With its **Edge2Edge® technology**, the EC52 cleans escalators and moving walkways from side to side no matter the width. The brush deck is fitted with thin spacers on one side, which allow the brushes to be placed flush with the balustrade. The brush deck then simply rotates 180° to clean the opposite side of the escalator with the same precision.

## SWEEPING AND WASHING PHASES

- **DRY CLEANING PHASE**  
The dry cycle, removes and vacuums small stones, dust, sand, and other small objects that can damage the internal mechanisms of an escalator.
- **WET CLEANING PHASE**  
Vaporizing a suitable detergent it's possible to remove stains and ingrained dirt, such as fat residues, oil, drinks, and other dirt that isn't eliminated in the dry cycle.

### OPTIONAL AUXILIARY VACUUM

In particularly dusty environments the EC52 can be connected to an external vacuum.

### SCRUBBER-DRYER SQUEEGEE

The EC52 TOP version includes a squeegee, making it possible to use the machine to scrub and dry small areas.

### LIFTING HANDLES & WHEELS FOR TRANSPORT

Agilely transport the machine to the work site, in any application.

### WORKS AUTONOMOUSLY

Once positioned, the machine works completely autonomously, and the user can therefore carry out other tasks in the vicinity, whilst supervising operation.

### BRUSHES IN PPL AND TYNEX

Interchangeable, according to the characteristics of the steps, the dirt, and the choice of cleaning mode.

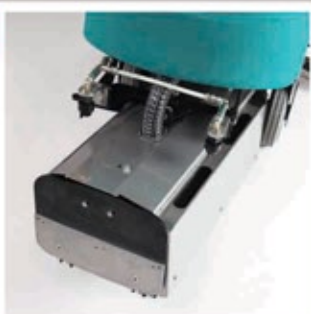

### COMPLETE ACCESSORY KIT

The kit includes spray gun for the pre-wash stage, and a tool to clean the risers. The kit is standard for the TOP version for the BASE version. The EC52 is the most complete, versatile, and competitive escalator cleaner on the market.

### EDGE2EDGE® TECHNOLOGY

Close cleaning right up to the escalator's balustrade, no matter of the width of the steps.
